

From Catalogue Management To Invoice Monitoring

Accelerate Procure to Pay Apps give you all means to put your spend under control. From the creation of your products and services catalogues to the management of the incoming invoices from your vendors, simplify and automate each step of the procurement process with Accelerate:

- Create your internal "Amazon-like" Webshop by broadcasting catalogues imported by your suppliers or by giving access to vendors online catalogs (punch-out catalogues).
- Collect, process and approve purchase requisitions from anyone in your company based on web catalogues or easy-to-use free forms.
- Create and follow purchase orders in close collaboration with the internal requesters and your vendors.
- Manage goods delivery, check invoices and proceed with payment.
- Check contract compliance, follow budget consumption, analyze payments, monitor global spending and much more thanks to the advanced BI reports.
