

FROM CATALOG MANAGEMENT TO INVOICE MONITORING

Accelerate Procure to Pay Solutions give you all the means to put your spend under control. From the creation of your products and services catalogs to the management of the incoming invoices from your vendors, simplify and automate each step of the procurement process with Accelerate:

Create your internal "Amazon-like" Webshop by **broadcasting catalogs** imported by your suppliers or **by giving access to vendors online catalogs** (punch-out catalogs).

Collect, process, and approve purchase requisitions from anyone in your company based on **web catalogs or easy-to-use free forms**.

Create and follow purchase orders in close collaboration with the internal requesters and your vendors.

Manage delivery of goods, check invoices, and proceed with payment.

Check contract compliance, **follow** budget consumption, **analyze** payments, **monitor** global spending and much more thanks to the **advanced BI reports**.

TIME SAVINGS ON THE ORDERING PROCESS

REDUCED MAVERICK SPENDING

PROCUREMENT PROCESS STANDARDIZATION

IMPROVED SPEND TRANSPARENCY

NEW SAVINGS OPPORTUNITIES

OUR **P2P APPS**

Catalog Management

Thanks to Accelerate Catalog Management, build and maintain online catalogs to help you streamline your P2P process and fight maverick spending.

Purchase Requisition

Inspired by the best practices of the most famous online stores, Accelerate Purchase Requisition provides a seamless user experience to your users during the requisition process and guarantees maximum adoption from the users.

Order & Receiving

Accelerate Order & Receiving helps you to better manage your procurement cycle, from the order to the delivery of your orders.

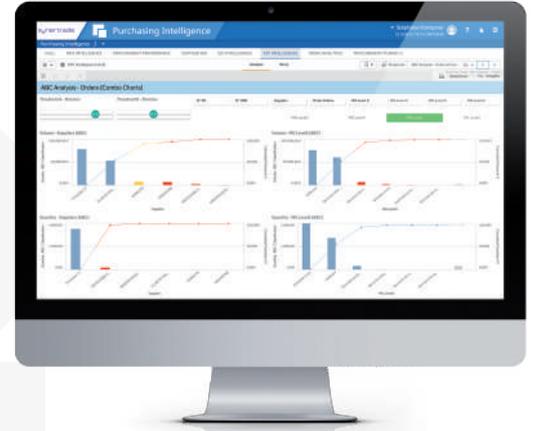

E-invoicing

Accelerate e-Invoicing simplifies invoice data entry and helps you streamline the matching process. Benefit from this simple and efficient e-Invoicing solution to save time and resources while increasing compliance and performance.

P2P Intelligence

Accelerate P2P Intelligence gives you a sharper vision of all the data and projects managed using our P2P applications.
